

# DOCTRACKER

THE SOLUTION FOR  
DOCUMENTS & BOOKS TRACKING

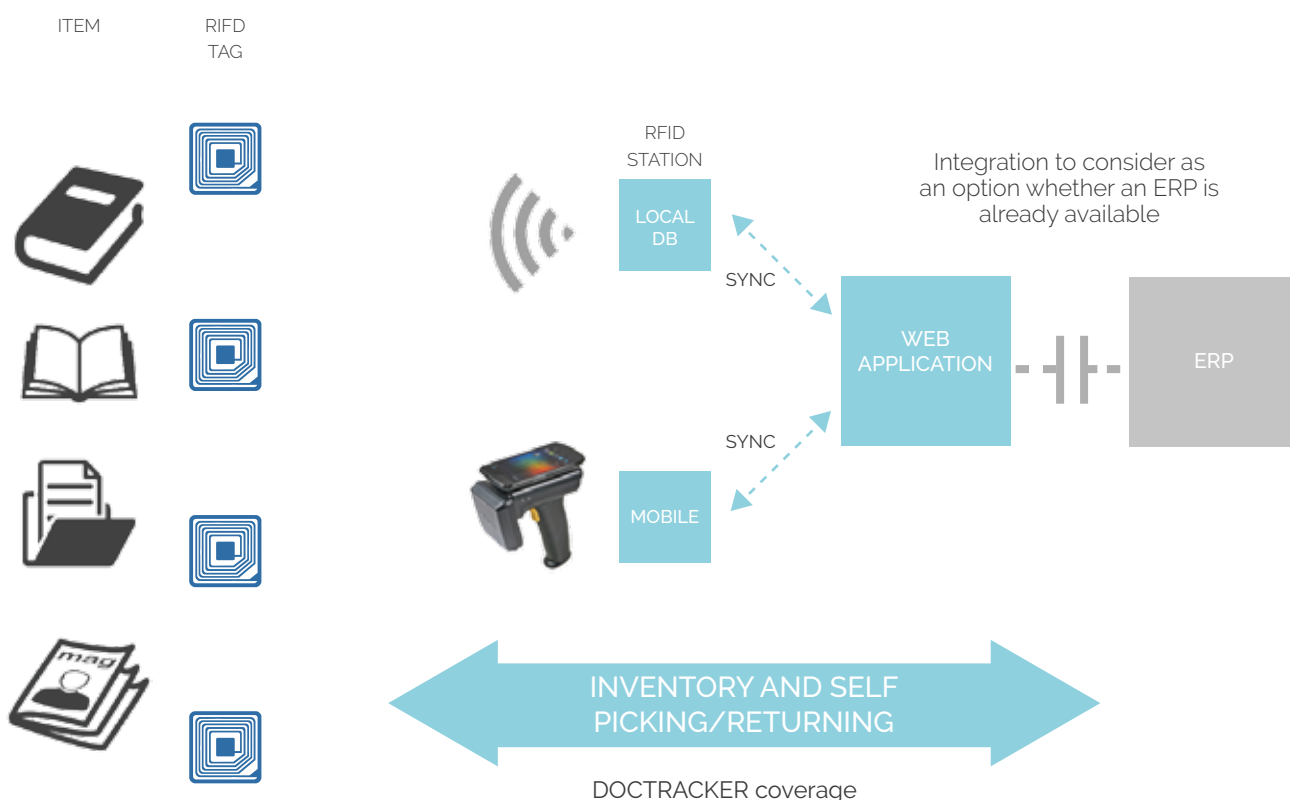

# DOCTRACKER OVERVIEW

DOCTRACKER is the solution for tracking books, magazines, documents, folders and many other similar items (including samples).

The solution is based on the RFID technology that allows to identify items without human intervention.

DOCTRACKER helps for:

- Fast inventory with handheld devices;
- Docs/Books/Folders self picking and returning;
- Tracking doc position;
- Antitheft system for security.

## How it is composed

The DOCTRACKER solution is given by:

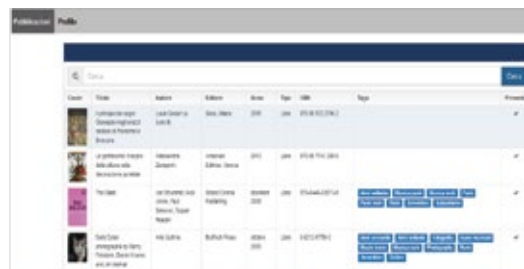

- management web application
- Android/iOS APP for consulting and reservation
- self service area picking and returning of items
- anti-theft gates for unauthorized picking
- printer for RFID labels
- handheld RFID devices for inventory
